MP3 Pizza Timer is a lightweight Windows application built specifically for helping you place a countdown timer on your desktop. It also offers support for sound notifications, so you are reminded to complete a certain task. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to use a countdown timer on the breeze, without having to go through installation steps. Interactive interface The layout looks like a small remote control that enables you to carry out most operations with minimal effort. The built-in buttons lets you easily adjust the time by adding or subtracting one, five, or eight hours. There is also support for other time values as well. Plus, you are allowed to manually set the time by performing a right-click mouse operation on the countdown timer and inputting the desired values. Main features MP3 Pizza Timer gives you the possibility to add

an audio file from your computer that is automatically played when the countdown timer comes to an end. It works with MIDI, AVI, or MP3 file format. The audio items can be added into the working environment using the built-in browse button or "drag and drop" support. What's more, you can play, pause, or the stop the current audio selection. Since it doesn't require much computer knowledge to set up the dedicated parameters, you can easily tweak the program's functions. During our testing we have noticed that the process is accomplished very quickly and the tool leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. Bottom line All things considered, MP3 Pizza Timer offers a simple software solution when it comes to helping you work with a countdown timer that provides support for sound notifications.Screenshot : Youtube I can't even tell you how long I've been having trouble relaxing, and that's not hyperbole.
